DDJ-1000 MAPPING - QUICKSTART

How can I learn this mapping?

Link to Videos: https://www.youtube.com/user/djestrela2
Link to Survey: https://forms.gle/cf8kqpr91HHxMJcn8

Basic Features:

Button	How do I	Answer
SHIFT	Do a Quick Search?	Press "Shift"+"jog wheel"
CUE/LOOP DEU	Zoom In?	Memory + turn the Browse encoder; If you press it goes to a default Zoom
SEARCH	Listen a whole playlist?	Use "Shift"+"Memory"+"Search" to iterate the tracks one-by-one.
3/1	Toggle Classic / Parallel?	Double click "deck select"
SHIFT	Toggle Elapsed / Remain?	Double click "shift"
SHIFT	Preview the tempo range?	"Shift" previews the tempo range. "Memory" for Loop/Move values. "Shift"+"Memory" for total length and base BPM
4 BEAT LOOP / EXIT	Activate a coming Loop?	Long press "4 beat auto loop"
KEY RESET	Adjust the beatgrid?	Hold "key sync" + jogwheel for adjusting the BPM; Hold "Key reset"+jog for the beatmarker
PLAY FRAME	Move to Front?	Pres shift+Cue to move to Front
CUE / LOOP EQUIPMEMORY	Customize the Settings?	All configurations always use shift + memory + "something". To make this permant, change the BOME file itself
NAME OF STREET	Improve performance?	Raise the BOME clock using "Shift"+"Memory"+"Browser"

Advanced Features #1:

Button	Name	Inspiration	Explanation
BACK	Preview player	S4 MK3	Fast way to preview and seek the tracks in the browser . No decks consumed, nor hand movement. Disables PFLs.
Adjust #1	STEMS / Remix D.	S4MK3	Change separately filter / Volume / mute / FX input of the STEM components, or Remix decks slots
SAMPLER	Pattern recorder	S4 MK3	Record a 16-step sequence of one-shots, and then play over it. Blink = recording; Solid = playing; Off = not playing
SEARCH	Move by 1-beat	S4 MK3	Corrects loops by 1-beat like the S4 move encoder. If there is no loop active, beatjumps 1 beat instead.
	JogFX chains	DJTT maps / Ean Golden	Hear the turntable break effect. Deck A and B only. This effect requires a small delay on pause (ie, a lag).
COLOR	Resonant Filter	DJM-900	Uses the filter in single FX mode with a lot more resonance than the standard MixerFX. Requires the 16x Filters enabled.
RATTRIZE	Turntable Off	CDJ-3000	Familiar Turntable power off sound.
0	Loop fine adjust	CDJ-3000	Use the CDJs to very finely adjust the Loops, manually. In = whole loop; out = only out point.

Advanced Features #2:

Button	Name	Inspiration	Explanation
LIGHT IN MANAGE	Instant doubles	DDJ-1000	Clones the right track to the currently selected left side, and vice-versa. Useful to always use your right hand to cue and scratch.
SLIP REVERSE	Echo Out effect	DDJ-SX2	Tap "Slip reverse". If you Hold it, it makes "censor" instead
4 BEAT LOOP/EXIT	Backwards Loops	Virtual DJ	Apply a loop backwards. In this mode you first listen to the loop once , and only then press shift+"auto loop"
	Loop IN point	Virtual DJ	Press shift+Loop IN/OUT to manipulate the IN point , while keeping the OUT point unchanged.
BEAT LOOP	Slicer	Serato	Break the loop into 8 slices. Best used with Slip mode. 3x modes available: full beat roll, front ½ roll, back ½ rool.
HOT CUE	Tone Play	Serato PnP	Change key up to 12 semitones. 3x modes: Cue and Play mode / Cue mode (=gate), play mode.
PAD FX1	Rolls	Serato	Repeat beat with different sizes. 2x modes: quantized and non-quantized
PAD FX1	Pad FX	Rekordbox and DJTT	21x instant gratification style padFX

Advanced features #3: DISABLED by default

These features are shipped <u>disabled</u> to avoid confusion.

To enable them, you NEED to press "shift+memory+button".

To make this permanent, change the bome config file.

	Button	Name	Inspiration	Explanation
	MASTER TEMPO	Tempo Enlarger	Rekordbox	Reaching the fader edge raises the tempo range automatically. Crossing "zero" sets the tempo to 6%
	DECK SELECT	Auto Layout	Rekordbox	Suitable for small screens . Automatically opens decks 3&4 when you access them.
	PLAY/PRIDE	TurnTable Break	CDJs	Adds a turntable break effect on pause. Deck A and B only. This effect requires a small delay on pause (ie, a lag).
SHIFT CUE/LOOP ITEM	SAMPLER VOL	TurnTable duration	CDJs	Set the duration of the pause for doing the break effect (left = 0s; right = 2seconds)
T MEMORY +	SOUND COLOR FX	Super knobs	RMX-1000	The filter knobs have two different effects on each side. One for the left, another for the right
	SOUND COLOR FX	16x Filters	VirtualDJ (modern EQ)	Deck 3&4 Filters control Effects of deck 1&2 instead.
	BEAT SINC MASTER	Sync Aid	Serato	Intermediate setting between BeatSync and TempoSync. Turing the jog disables sync; pressing Cue enables sync
	CUE TAP	External CUE	Rekordbox PC Master out	Enables traktor internal cue volume and cue mix. Enable when using another soundcard (eg laptop internal)
		BOME clock		Calibrates the mapping CPU requirements . Low values = fast CPUs; High values = slow CPUs.

Differences to Rekordbox shortcuts

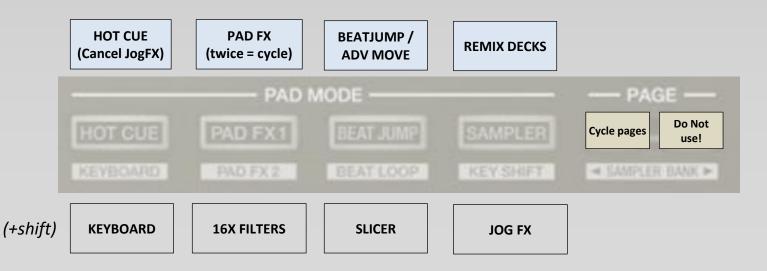

Very Important: some features use different shortcuts than Rekordbox. Reasons are being too dangerous, or compatibility with SX2/SZ mapping

What	Rekordbox	Traktor Mapping	Reason
Preview Player	(use mouse-only)	BACK +	(not mappable in Rekordbox)
Tree Browse	BACK	+ O	(Simpler usage)
Quick Search	SEARCH +	+ G	(compatibility with SX2/SZ mapping)
Beat Grid	+	KEY SYNC / RESET +	(shortcut was too dangerous)
Deck Zoom	+	MEMORY +	(shift+knob = browse tree in traktor)
Next Track / Prev Track	(tap)	CUE/LOOP EST	(shortcut was too dangerous)
Loop Adjust	+	(long press)	(matches CDJs, and is easier to use)
Key Sync / Key Reset	KEY SYNC KEY RESET	(use mouse only)	(buttons taken with beatgrid)

There are 3 different shifts!

There are 8x Pad Modes:

4x Filters mode (Deck A/B/C/D)

SELECTION:

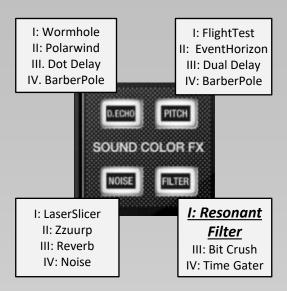

- In <u>normal mode</u>:
 - Each button selects one filter
 - Each knob works the normal way
- As such: 4 (buttons) x 1 (sides) x 1 (knobs) = 4x effects

Traktor GUI:

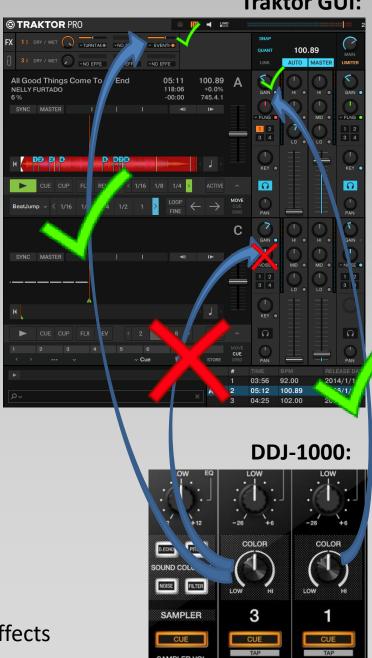

16x Filters mode (Deck A and B only)

SELECTION:

- In 16x filters mode:
 - Each button selects four effects
 - Each knob has two sides (RMX-1000 style)
 - Knobs 3&4 control Deck 1&2 instead
- As such: 4 (buttons) x = 2 (sides) x = 2 (knobs) = 16x = 16

Traktor GUI:

7x JogFX: chain a three effects controlled by the Jogwheel

Which effects runs in which FX Units?

When doing an automated effect, look at the screen to see what runs on the FX units. Do not forget you need to import the mapping <u>twice</u> to have the correct FX list.

<u>Safety:</u> Moving the selector to the <u>Sample position</u> cancels all effects.
